

Using New-edition Qtum Wallet for INK Transfer

Following another update, the Qtum wallet transfer is now more convenient. Please follow the steps below for INK transfer in Qtum wallet

1、 Download the New Version QtumWallet

- 1) Copy <https://github.com/qtumproject/qtum/releases> to the browser ;
- 2) Scroll down to Quickstart, there are three versions here for different platforms, namely Windows, OSX and Linux. Choose the relevant version based on your device. Here is the recommendation.

Windows:

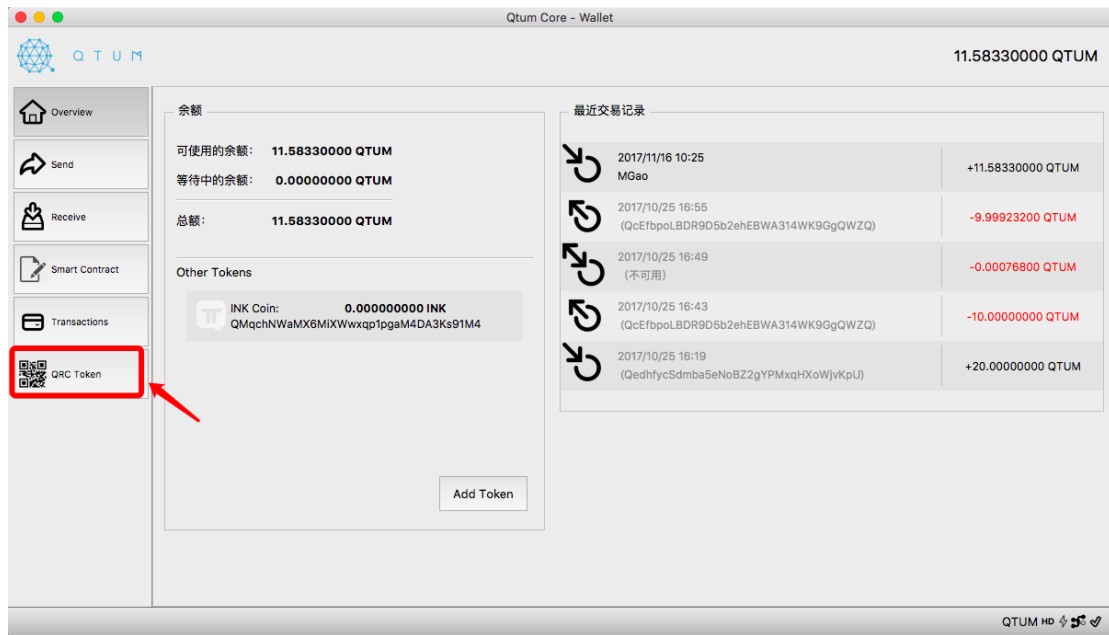

32 bit system, recommend to use [qtum-0.14.7-win32-setup-unsigned.exe](#)

64 bit system, recommend to use [qtum-0.14.7-win64-setup-unsigned.exe](#)

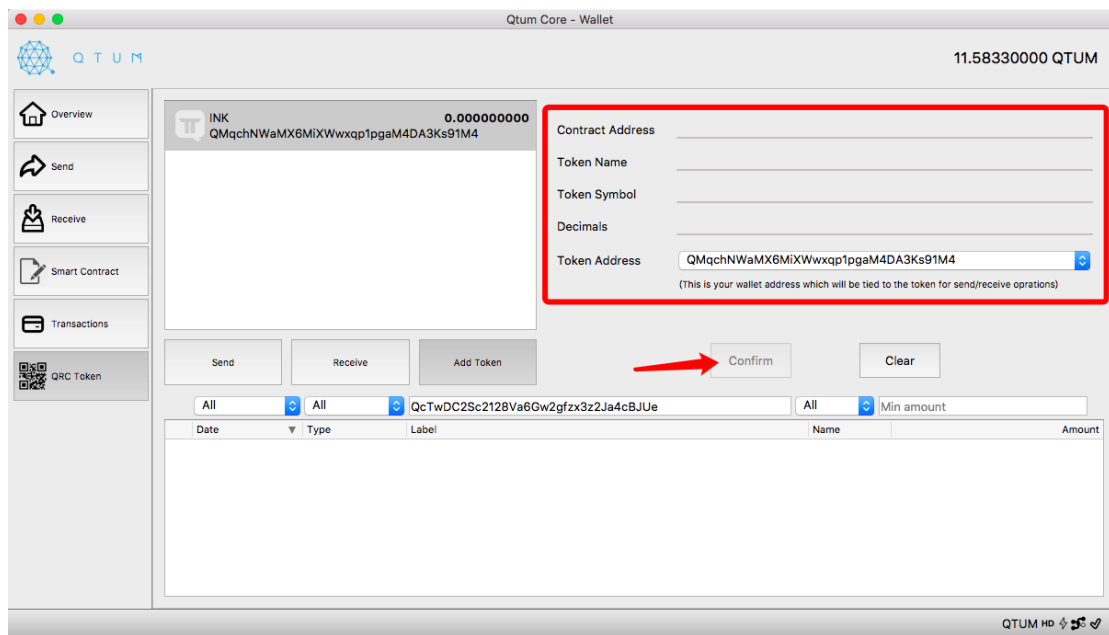

OSX:

Mac series recommend to use [qtum-0.14.7-osx-unsigned.dmg](#)

Compared with the previous versions, it can be seen that the new version Qtum wallet has an additional “QRC Token”

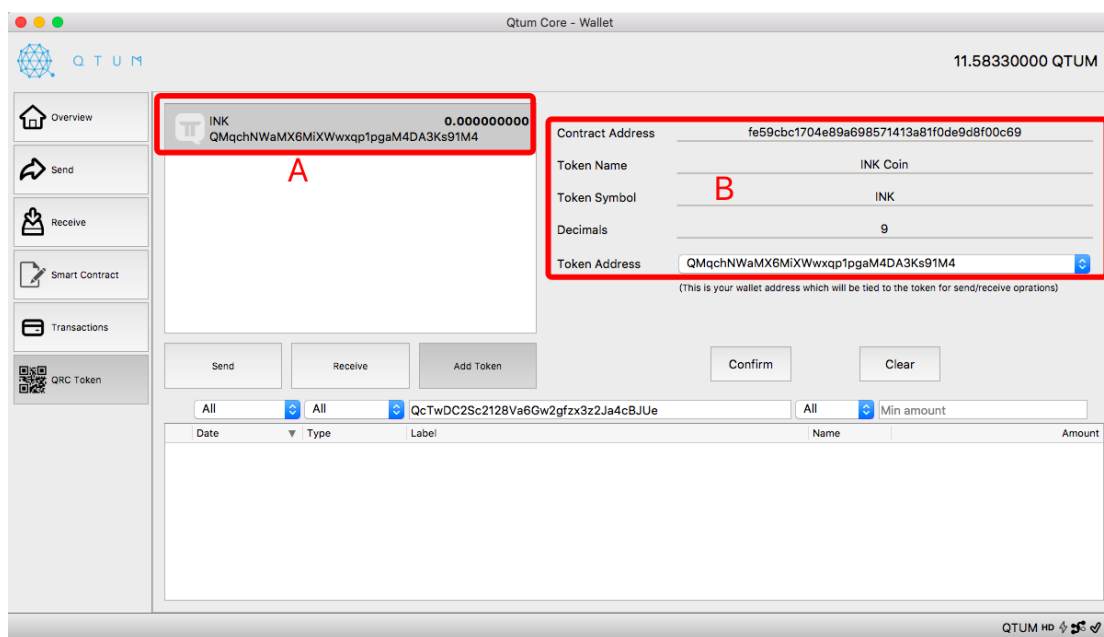

2、Click “QRC Token” to enter the interface below

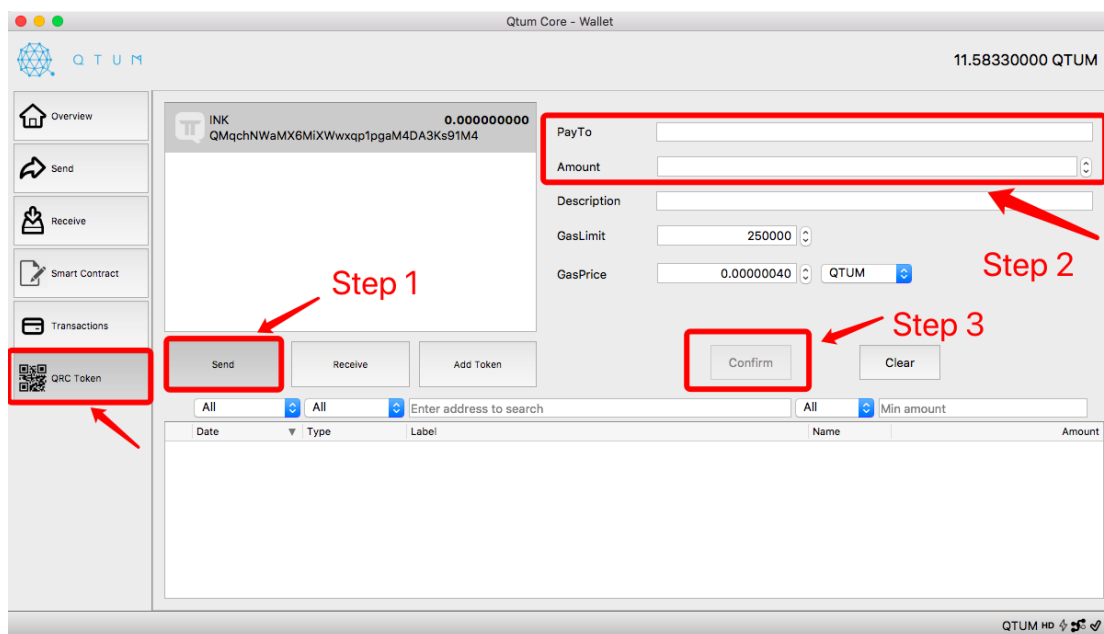

- 1) Input **【fe59cbc1704e89a698571413a81f0de9d8f00c69】** into the Contract Address, “Token Name”“Token Symbol”“Decimal” will be generated automatically
- 2) For Token Address, Choose the Qtum wallet address bound with the Ink official website (There must be QTUM in the wallet, otherwise the address cannot be selected)

3) Click Confirm to get the result below

In region A, you can see the INK allocation you own. In region B, you will see content filled up previously as well as the automatically generated content.

3、 Transfer INK to Other People

In "QRC Token", follow the following procedure for transfer :

Step 1: Click "Send";

Step 2: In Pay To, key in the address of the receiving person. In Amount, key in the amount to be transferred;

Step 3 : Click Confirm. The transfer is successful.

Note: The INK in the wallet cannot be completely transferred out. There must be some INK remaining in the wallet. There is no limit to the remaining amount. For example: if there are 10 INK in the wallet, 9.9999 INK can be transferred out.
